SECTION III: RISK FACTORS

RISK FACTOR

Any investment in equity securities involves a high degree of risk. Investor should carefully consider all the information in this draft prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. To obtain a more complete understanding, you should read this section together with Sections titled, “Our Business”, “Particulars of the Issue”, “Industry Overview”, “Financial Statement as Restated”, “Outstanding Litigation and Other Material Developments”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page no. 69, 51, 60, 102, 134, and 130 respectively, as well as the other financial and statistical information contained in this draft prospectus.

Any of the following risks, as well as the other risks and uncertainties discussed in this draft prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This draft prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this draft prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian GAAP, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some risks may not be material individually but may be material when considered collectively.
2. Some risks may have material impact qualitatively instead of quantitatively.
3. Some risks may not be material at present but may have a material impact in the future.

INTERNAL RISK FACTOR:

Industry specific Risk:

1. **There are certain outstanding litigation involving our Company/promoters/directors, which, if determined adversely, may affect our business and operations and our reputation.**

Our Company/promoters/directors is involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties by other statutory authorities, our Company may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation.

Brief details of such outstanding litigation as of the date of this Draft Prospectus are set forth hereunder:

2. Our business is dependent on a few customers and the loss of, or a significant reduction in award of contracts by such customers could adversely affect our business.

Revenues from any particular client may vary significantly from reporting period to reporting period depending on the nature of ongoing contracts projects and the implementation schedule and stage of completion of such projects. Larger contracts from few customers may represent a larger part of our portfolio, increasing the potential volatility of our results and exposure to individual contract risks. Such concentration of our business on a few projects or clients may have an adverse effect on our results of operations and result in a significant reduction in the award of contracts which could also adversely affect our business if we do not achieve our expected margins or suffer losses on one or more of these large contracts, from such clients.

Further, we cannot assure you that we can maintain the historical levels of project orders from these clients or that we will be able to find new clients in case we lose any of them. Furthermore, major events affecting our clients, such as adverse market conditions, regulatory changes, adverse cash flows, change of management, mergers and acquisitions by clients could adversely impact our business. If any of our major clients become bankrupt or insolvent, we may lose some or all of our business from that client and our receivables from that client may have to be written off, thus adversely impacting our cash flows and financial condition.

Our long-standing relationship with certain of our customers is a result of our timely and efficient completion of work. However, in the event we are unable to complete our projects within the duration prescribed under our contracts, or the quality of our work deteriorates, then our relationship will get strained and we may not get further orders from our current clients which could adversely affect our business. In addition, our clients may also be entitled to terminate the agreement in the event of delay in completion of the work if the delay is not on account of any of the agreed exceptions.

Consequently, the loss of any of our significant clients, could have an adverse effect on our business, cash flows and results of operations. In addition, any adverse change in the projects that we are constructing for them, such as delays or stoppages in completion schedules, changes to the agreed designs or failure to obtain regulatory permits for such projects by clients, may also have an adverse effect on our business.

3. Our business and our financial condition would be materially and adversely affected if we fail to obtain new contracts.

We are into the business of Execution of Engineering, Procurement, Construction (EPC - Power & Solar) projects for Electrification, Power Substations, Underground Cabling from 11kV to 220kV. The company also provides Turnkey execution of Civil Infrastructure projects such as Industrial buildings and Turnkey execution of water infrastructure management projects such as water transmission and distribution work. We bid for projects on an ongoing basis. Infrastructure projects are typically awarded to us following a competitive bidding process and satisfaction of prescribed pre-qualification criteria. While service quality, health and safety records and personnel, as well as reputation and experience and sufficiency of financial resources are important considerations in final bid decisions, there can be no assurance that we would be able to meet such financial and technical qualification criteria, whether independently or together with other joint venture partners. Further, once the prospective bidders satisfy the pre-qualification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. We generally incur significant costs in the preparation and submission of bids, which are one-time non-reimbursable costs. We cannot assure you that we would bid where we have been pre-qualified to submit a bid or that our bids, when submitted or if already submitted, would be accepted. We may also not be able to secure bids due to negligence or disqualification of our joint venture partners in cases of bids in a consortium as these factors are beyond our control.

If we are not able to pre-qualify in our own right to bid for large construction and development projects, we may be required to partner and collaborate with other companies for joint bidding for such projects. If we are unable to partner with other companies or lack the credentials to be the partner-of-choice for other companies, we may lose the opportunity to bid for large construction and development projects, which could affect our growth plans. Additionally, tender processes conducted by the Indian government authorities may be subject to change in qualification criteria, unexpected delays and uncertainties. There can be no assurance that the projects for which we bid will be tendered within a reasonable time, or at all. In the event that new projects which have been announced and which we plan to tender for are not put up for tender within the announced timeframe, or qualification criteria are modified such that we are unable to qualify, our business, prospects, financial condition, cash flows and results of operations could be materially and adversely affected. Further, a change in government policies that results in a reduction in capital investment in the infrastructure sector could affect us adversely. If there is any change in the government or in governmental policies, practices or focus that results in a slowdown in infrastructure projects, our business, prospects, financial condition and results of operations may be materially and adversely affected.

The growth of our business mainly depends on our ability to obtain new contracts in the sectors in which we operate. Generally, it is very difficult to predict whether and when we will be awarded a new contract. Our future results of operations and cash flows can fluctuate materially from period to period depending on the timely award of contracts,

commencement of work and completion of projects in the scheduled time period. If we are unable to obtain new contracts for our business, our business will be materially and adversely affected.

4. *Delays in the completion of construction of current and future projects could lead to termination of EPC contracts or cost overruns or claims for damages, which could have an adverse effect on our cash flows, business, results of operations and financial condition.*

Our projects are required to achieve commercial operation no later than the scheduled commercial operation dates specified under the relevant EPC contracts, or by the end of the extension period, if any is granted by our clients. We provide our clients with performance guarantees for completion of the construction of our projects within a specified time frame. In case the performance guarantees could not be provided then the Clients has the option to deduct such amount from our receivables. Subject to certain customary exceptions such as (i) occurrence and continuance of force majeure events that are not within our control, or (ii) delays that are caused due to reasons solely attributable to our client, failure to adhere to contractually agreed timelines or extended timelines could require us to pay liquidated damages as stipulated in the EPC contract or lead to encashment and appropriation of the bank guarantee or performance security. Such liquidated damages are often specified as a fixed percentage of the contract price and our clients are entitled to deduct the amount of damages from the payments due to us. The client may also be entitled to terminate the EPC contract in the event of delay in completion of the work if the delay is not on account of any of the agreed exceptions. With respect to some of our projects, in the event of termination for any of the aforesaid reasons, we may only receive partial payments under such agreements and such payments may be less than our estimated cash flows from such projects. Further, we may not be able to obtain extensions for projects on which we face delays or time overruns. In addition to the risk of termination by the client, delays in completion of development may result in cost overruns, lower or no returns on capital and reduced revenue for the client thus impacting the project's performance, as well as failure to meet scheduled debt service payment dates and increased interest costs from our financing agreements for the projects. We have faced delays in completion of our projects and may continue to face delays in completion of certain of our projects which are under construction. The scheduled completion targets for our projects are estimates and are subject to delays as a result of, among other things, unforeseen engineering problems, force majeure events, issues arising out of right of way, unavailability of financing, unanticipated cost increases or adverse climatic conditions. We cannot assure you that such delays will not occur in the future. Such delays could jeopardize our reputation and our relationship with our existing clients and have adverse effects on our cash flows, business, results of operations and financial condition.

5. *Impact of Slump Sale of the proprietorship firm M/s Promax Technologies with Promax Power Pvt. Ltd.*

Our Company has taken over the Project Management & Execution Undertaking business of a proprietorship firm namely M/s Promax Technologies (Prop: Vishal Bhardwaj), through Slump Sale with effect from March 31, 2020 vide Slump Sale Agreement (SSA) dated March 31, 2020.

As on the date of this Draft Prospectus, the proprietorship firm M/s. Promax Technologies has not been closed. If the Proprietor Mr. Vishal Bhardwaj choses to continue the business of the firm similar to the company then the operations/business/revenue of the Company may get affected.

6. *Our business is manpower intensive and any unavailability of our employees or shortage of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.*

Our business is manpower intensive and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of contract labourers at our project locations. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations. The number of contract labourers employed by us varies from time to time based on the nature and extent of work contracted to us and the availability of contract labour. We may not be able to secure the required number of contractual labourers required for the timely execution of our projects for a variety of reasons including, but not limited to, possibility of disputes with sub-contractors, strikes, less competitive rates to our sub-contractors as compared to our competitors or changes in labour regulations that may limit availability of contractual labour. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations.

Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations. In respect of labour cost and overhead cost components, based on our internal estimates and belief, we include appropriate escalation provisions in the cost estimates at the time of bidding for a project. However, we may enter into EPC contracts in the future which may not contain price escalation clauses covering increase in the cost of labour. Any such increase in labour cost may have an adverse impact on our revenue from operations and profitability.

7. *We operate in a highly-competitive and fragmented industry, and our business, results of operations and financial condition may be adversely affected if we are not able to compete effectively.*

Promax provides engineering, procurement, construction, project management and Commissioning services on a Turnkey basis to the Power Sector which is highly competitive and fragmented industries. The entry barriers in the business are low and numerous players operate in the industry. The company faces tough competition from a large number of unorganised and a few organized players. The margins of the company may be constrained in the future due to volatility in the price of raw materials and consumables and intense competition from new as well as established players. Our future success depends on our ability to compete effectively, including by distinguishing our products, content or services from our competitors, by expanding our brands and titles, by providing higher quality content, expanding our distribution, sales and marketing forces, or by expanding our portfolio of digital products and educational services.

8. *We are yet to obtain consent from some of our lenders for the Offer*

Our Company has entered into several types of borrowing facilities of varying terms and tenures from lenders. Our Company sought to obtain the relevant consent from the respective lenders in advance of the date of this Draft Prospectus. However, as on date of this Draft Prospectus, we are yet to receive consent from our lenders. Our Company proposes to obtain such consents prior to filing the Prospectus with the RoC. Undertaking any of the above including the Offer without such consents constitutes a default under the relevant financing documents and will entitle the respective lenders to declare a default against our Company and enforce remedies under the terms of the financing documents, that include, among others, acceleration in repayment of the amounts outstanding under the financing documents, enforcement of any security interest created under the financing documents, and taking possession of the assets given as security in respect of the financing documents. A default by our Company under the terms of any financing document may also trigger a cross-default under some of the other financing documents of our Company, or any other agreements or instruments of our Company containing a cross-default provision, which may individually or in aggregate, have an adverse effect on our operations, financial position and credit rating. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "*Financial Indebtedness*" on page 127.

9. *Our business is dependent on a continuing relationship with our clients and strategic partners.*

We develop and maintain relationships and pre-qualified status with certain major clients and obtaining a share of contracts from such clients. Our business and results of operations will be adversely affected if we are unable to develop and maintain a continuing relationship or pre-qualified status with certain of our key clients and strategic partners. The loss of a significant client or a number of significant clients may have a material adverse effect on our results of operations.

10. *We cannot assure you that we will be able to successfully execute our growth strategies, which could affect our business prospects and results of operations.*

Our growth strategies could place significant demand on our management and our administrative, technological, operational and financial infrastructure. As a result, we may be unable to maintain the quality of our services as our business grows. Our growth strategies are dependent on various circumstances, including business developments, new business(es) (including those incidentals to our EPC business focused activities), on-time completion of our projects, investment opportunities or unforeseen contingencies. We could also encounter difficulties and delays in executing our growth strategies due to a number of factors, including, without limitation, unavailability of human and capital resources, delayed payments or non-payments by clients, failure to implement bidding strategy, failure to correctly identify market trends, increase in cost of raw material, fuel, labour etc., failure to form and maintain alliance with joint venture partners, failure on the part of our joint venture partners to perform their contractual obligations or any other risk that we may or may not have foreseen and such difficulties may result in delay in the execution of our projects. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation.

In addition, if we raise additional funds for our growth through incurrence of debt, our interest and debt repayment obligations will increase, and we may be subject to additional covenants, which could limit our ability to access cash flow from operations and/or other means of financing. Further, our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and financial market conditions, credit availability from banks, investor confidence, the continued success of our current projects and other laws that are conducive to our capital raising initiatives. Our attempts to consummate future financings may not be successful or be on terms favourable to us. Our management may also change its view on the desirability of current strategies, and any resultant change in our strategies could put significant strain on our resources. We may also be unable to achieve the targeted levels of operations from our future projects. If we are unable to successfully execute our growth strategies, our business, prospects and results of operations could be materially and adversely affected.

11. Our business is relatively concentrated in northern, eastern and southern part of India and any adverse development in these regions may adversely affect our business, results of operations and financial condition.

While we carry on business in various states of India, our project portfolio has historically been concentrated in the northern, eastern and southern States of India. This concentration of business subjects us to various risks in these states, including but not limited to:

- a. regional slowdown in construction activities or reduction in infrastructure projects;
- b. interruptions on account of adverse climatic conditions;
- c. vulnerability to change in laws, policies and regulations of the political and economic environment;
- d. perception by our potential customers that we are a regional construction company which hampers us from competing for large and complex projects at the national level;
- e. our lack of brand recognition and reputation in such regions;
- f. our lack of familiarity with the social and cultural conditions of these new regions; and
- g. limitation on our ability to implement the strategy to cluster projects in the states where we intend to conduct business.

We may also encounter other additional anticipated risks and significant competition in such markets. Due to our limited experience in undertaking certain types of projects or offering certain services, our entry into new business segments or new geographical areas may not be successful, which could hamper our growth and damage our reputation. We may be unable to compete effectively for projects in these segments or areas or execute the awarded projects efficiently. Further, our new business or projects may turn out to be mutually disruptive and may cause an interruption to our business as a result.

While we strive to geographically diversify our project portfolio and reduce our concentration risk, we cannot assure you that adverse developments associated with the region will not impact on our business. If we are unable to mitigate the concentration risk, we may not be able to develop our business as planned and our business, financial condition and results of operation could be adversely affected.

12. Disqualification of Our Directors by Ministry of Corporate Affairs.

Our Promoter directors Mr. Vishal Bhardwaj and Mrs. Shweta Bhardwaj were appearing in the list of disqualified directors published on the MCA website 18th September, 2017 under section 164(2)(a) of the Companies Act, 2013. However, based on the reply to the Application seeking information under RTI Act, 2005, ROC-Punjab & Chandigarh vide its letter ref no: Roc/Chd/RTI/PJ/2655 dated 19th August, 2021 has stated that as per the record of MCA portal the status of DIN of Director vide no. 03133388 (Mr. Vishal Bhardwaj) is approved and not disqualified & vide its letter ref. no. Roc/Chd/RTI/PJ/2656 dated 19th August, 2021 has stated that as per the record of MCA portal the status of DIN of Director vide no. 03521776 (Mrs. Shweta Bhardwaj) is approved and not disqualified.

13. We have working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.

Our business requires working capital, part of which would be met through additional borrowings in the future. In many cases, significant amounts of working capital are required to finance the procurement of raw materials, labour and the performance of engineering, construction and other work on projects before payments are received from clients. In certain cases, we are contractually obligated to our clients to fund the working capital requirements of our projects. Our working capital requirements may increase if, under certain contracts, payment terms do not include advance payments or such contracts have payment schedules that shift payments toward the end of a project or otherwise increase our working capital burdens. Further, the cost of deploying new modern equipment for execution of our projects have significantly increased our working capital requirements. Additionally, our working capital requirements have increased in recent years due to the general growth of our business and also on account of the fact that our Company may have undertaken a growing number of projects within a similar timeframe. All of these factors may result, or have resulted, in increases in our working capital needs.

It is customary in the industry in which we operate to provide bank guarantees or performance bonds in favor of clients to secure obligations under contracts. In addition, letters of credit are often required to satisfy payment obligations to suppliers and sub-contractors. If we are unable to provide sufficient collateral to secure the letters of credit, bank guarantees or performance bonds, our ability to enter into new contracts or obtain adequate supplies could be limited. Providing security to obtain letters of credit, bank guarantees and performance bonds increases our working capital needs. We may not be able to continue obtaining new letters of credit, bank guarantees, and performance bonds in sufficient quantities to match our business requirements. Our expansion plans require significant expenditure and if we are unable to obtain necessary funds for expansion, our business may be adversely affected.

Due to various factors, including certain extraneous factors such as changes in tariff regulations, interest rates, insurance and other costs or borrowing and lending restrictions, if any, we may not be able to finance our working capital needs, or secure other financing when needed, on acceptable commercial terms, or at all, which may have a material adverse effect on our business, financial condition, growth prospects and results of operation.

14. Our actual cost in executing an EPC contract may vary substantially from the assumptions underlying our bid. We may be unable to recover all or some of the additional expenses, which may have a material adverse effect on our results of operations, cash flows and financial condition.

Under the terms and conditions of our EPC contracts, based on our internal estimates and belief, we include appropriate escalation provisions in the cost estimates at the time of bidding for a project. However, we may enter into EPC contracts in the future which may not contain price escalation clauses covering increase in the cost of construction materials, fuel, labour and other inputs. Accordingly, our actual expense in executing an EPC contract under construction may vary substantially from the assumptions underlying our bid for several reasons, including, but not limited to unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability of the client to obtain requisite environmental and other approvals resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform.

Our ability to pass on increases in the purchase price or manufacturing cost of raw materials and other inputs may be limited in the case of contracts with limited or no price escalation provisions and we cannot assure you that these variations in cost will not lead to financial losses to our Company. Further, other risks generally inherent to the development and construction industry may result in our profits from a project being less than as originally estimated or may result in us experiencing losses due to cost and time overruns, which could have a material adverse effect on our cash flows, business, financial condition and results of operations.

15. Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.

Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues which have material impact, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service, machinery break down, attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

16. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favourable terms, or at all.

Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability.

If any of these risks were to materialise, our business and results of operations may be adversely affected. Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings.

17. Our Registered Office and other branch office from where we operate are not owned by us

Our Registered Office premise is situated at House No: 1575, Ground Floor, Sector – 38B, Chandigarh – 160038, Union Territory, India, which is owned by promoters of our company. Further, we have branch offices at other palces also which are taken on rent. We are occupying the premises on basis of Leave and License agreement signed by our Company. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. (For further details, see section **“Our Business”** on page 69 of this draft prospectus.)

18. Our business and results of operations are dependent on the contracts, including certain short-term contracts that we enter into with our customers. Any breach of the conditions under these contracts may adversely affect our business and results of operations

We have entered into some short-term as well as long-term contracts/ master service agreements with our customers which, depending on the customer, may contain certain terms and conditions. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other current and prospective customers, reduce demand for our products, damage our reputation and harm our business, results of operations and financial condition. While we internally consider all such factors prior to entering into these contracts, we cannot assure you that we will be able to continue to enter into similar such contracts in the future, which are not more onerous than the contracts we enter into currently. Additionally, non-compliance with the terms of our contracts, including breach of confidentiality provisions, may subject us to damages or penalties, lead to termination of the contracts and also result in us being unable to attract further business in the future.

19. Our Company had negative cash flow from operating activity in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow from operating activity in the financial years as mentioned below, which could affect our business and growth:

(In Rs.)

20. The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future.

We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

21. Our success depends heavily upon our Promoters and Directors for their continuing services, strategic guidance and financial support.

Our success depends heavily upon the continuing services of Promoters & Directors who are the natural person in control of our Company. Our Promoters have a vast experience in the field of EPC Contract works through their erstwhile Proprietorship firms engaged in similar business. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company’s current customer and supplier relations. We believe that our relation with our Promoters, who have rich experience in EPC Contract works, managing clients and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters are also part of certain other firms / ventures and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Directors for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

In addition, we depend on our Directors / Promoters in availing certain bank loans and for the extension of unsecured loans and advances from time to time. We rely on our Directors and Promoters, in relation to our bank loans for which they have granted certain security and personal guarantees. For details, see chapter titled “*Financial Indebtedness*” on page nos. 127 of this Draft Prospectus. We cannot assure you that any future financing we obtain without guarantees from our Directors / Promoters or from unrelated third-parties will be on terms which are equal to or more favourable than the terms of our past financings.

- 22. *Our Company has entered into certain related party transactions and may continue to do so in the future.***
Our Company has entered into related party transactions with our Promoters, Directors, Group Entities and their relatives. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “*Related Party Transactions*” under section titled “*Financial Statements as Restated*” on page no. 125 of this Draft Prospectus.
- 23. *Our Company has availed unsecured loan from our Directors / Promoters and Promoter Group which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.***
Our Company has availed certain unsecured loan and are repayable on demand. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “*Unsecured Loans*” under “*Financial Statements as restated*” beginning on page no. 102 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.
- 24. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences in timely manner or comply with such rules and regulations or at all may adversely affect our operations.***
We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled “*Key Regulations and Policies*” and “*Government and Other Key Approvals*” at pages 76 and 139 respectively of this Draft Prospectus.
- 25. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***
Some of our Directors (including our Promoters) and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoters & our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoters and Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoters and Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects. For further details of our transactions or interests of our promoters / promoter group, please refer the chapters titled “*Our Promoters and Promoter Group*” and “*Our Group Companies*”, “*Related Party Transactions*” and “*Financial Information as Restated*” beginning on page nos. 95, 98, 125 and 102 respectively, of this Prospectus.
- 26. *The Qualification and Experience Proof of some of our Promoters & Directors are unavailable.***
Our Promoters and Directors are qualified and are highly experienced to run the day-to-day affairs of the Company. However, the Qualification and Experience Proof (as mentioned in the Draft Prospectus) of some of our Promoters & Directors are not available.

- 27. Our Company's insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.**

Our Company has not covered itself against business or operational risks.

- 28. We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.**

Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

- 29. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.**

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

- 30. Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.**

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this draft prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this draft prospectus.

- 31. Within the parameters as mentioned in the chapter titled "Objects of this Issue" beginning on page 51 of this draft prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.**

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2021-22 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled "**Objects of the Issue**" beginning on page 51 of this draft prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "**Objects of the Issue**" beginning on page 51 of this draft prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

- 32. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.**

Since the Issue size is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our

Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

33. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 101 of this draft prospectus.

34. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

35. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors. For further information, see the chapter titled “*Basis for Issue Price*” beginning on page no. 55 of this draft prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

36. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

37. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

EXTERNAL RISKFACTORS

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the draft prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the draft prospectus should accordingly be limited.

4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and Power Sector industry contained in the draft prospectus.*

While facts and other statistics in the draft prospectus relating to India, the Indian economy and the Power Sector industry has been based on various government publications, reports from government agencies, India Brand Equity Foundation and industry publications etc that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "*Industry Overview*" beginning on page 60 of this draft prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract*

foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

10. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

The current Covid-19 pandemic had brought the world to a standstill affecting all sectors and the livelihood of many are at stake including the Indian economy. However, our Country is achieving normalcy by various measures taken by the Government. The pandemic is still to be controlled and any major outbreak will seriously impact our business. Further, our Country in the past has experienced natural calamities such as earthquakes, tsunami, floods etc. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

12. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures. In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy. Increased government expenditure is expected to attract private investments, with production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded and measured policy support is anticipated to boost the Indian economy. In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of Rs. 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth Rs. 45,000 crore (US\$ 6.07 billion). Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

As indicated by provisional estimates released by the National Statistical Office (NSO), India posted a V-shaped recovery in the second half of FY21. As per these estimates, India registered an increase of 1.1% in the second half of FY21; this was driven by the gradual and phased unlocking of industrial activities, increased investments and growth in government expenditure. India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030. Introduction

Power is among the most critical component of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy. India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

In May 2018, India ranked fourth in the Asia Pacific region out of 25 nations on an index that measured their overall power. India was ranked fourth in wind power, fifth in solar power and fifth in renewable power installed capacity as of 2018. India ranked sixth in the list of countries to make significant investments in clean energy at US\$ 90 billion. India is the only country among the G20 nations that is on track to achieve the targets under the Paris Agreement.

Market Size

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower). By 2022, solar energy is estimated to contribute 114 GW, followed by 67 GW from wind power and 15 GW from biomass and hydropower. The target for renewable energy has been increased to 227 GW by 2022. In FY22 (until May 2021), the total thermal installed capacity in the country stood at 234.72 GW. Installed capacity of renewable, hydro and nuclear energy totalled 95.65 GW, 46.21 GW and 6.78 GW, respectively.

Investment Scenario

Introduction

Indian renewable energy sector is the fourth most attractive renewable energy market in the world¹. India was ranked fifth in wind power, fifth in solar power and fourth in renewable power installed capacity, as of 2019. Installed renewable power generation capacity has gained pace over the past few years, posting a CAGR of 17.33% between FY16-20. With the increased support of Government and improved economics, the sector has become attractive from investors perspective. As India looks to meet its energy demand on its own, which is expected to reach 15,820 TWh by 2040, renewable energy is set to play an important role. The government is aiming to achieve 227 GW of renewable energy capacity (including 114 GW of solar capacity addition and 67 GW of wind power capacity) by 2022, more than its 175 GW target as per the Paris Agreement. The government plans to establish renewable energy capacity of 523 GW (including 73 GW from Hydro) by 2030.

Market Size

As of May 2021, India had 95.7 GW of renewable energy capacity, and represents ~ 25% of the overall installed power capacity, providing a great opportunity for the expansion of green data centres. The country is targeting about 450 Gigawatt (GW) of installed renewable energy capacity by 2030 – about 280 GW (over 60%) is expected from solar. Installed renewable power-generation capacity has increased at a fast pace over the past few years, posting a CAGR of 15.51% between FY16 and FY21. India had 94.4 GW of renewable energy capacity in FY21. From April 2015 to February 2021, India has added 117.9 GW of power generation capacity, including 64.5 GW of conventional source and 53.4 GW from renewable sources. By December 2019, 15,100 megawatts (MW) of wind power projects were issued, of which, projects of 12,162.50 MW capacity have already been awarded². Power generation from renewable energy sources in India reached 127.01 billion units (BU) in FY20. With a potential capacity of 363 GW and with policies focused on the renewable energy sector, Northern India is expected to become the hub for renewable energy in India.³

It is expected that by 2040, around 49% of the total electricity will be generated by renewable energy as more efficient batteries will be used to store electricity, which will further cut the solar energy cost by 66% as compared to the current cost. *Use of renewables in place of coal will save India Rs. 54,000 crore (US\$ 8.43 billion) annually³. Renewable energy will

account for 55% of the total installed power capacity by 2030. As per the Central Electricity Authority (CEA) estimates, by 2029-30, the share of renewable energy generation would increase from 18% to 44%, while that of thermal is expected to reduce from 78% to 52%. According to the year-end review (2020) by the Ministry of New and Renewable Energy, another 49.59 GW of renewable energy capacity is under installation and an additional 27.41 GW of capacity has been tendered. This puts the total capacity of renewable energy projects (already commissioned or in the pipeline) at ~167 GW. The Government of India wants to develop a 'green city' in every state of the country, powered by renewable energy. The 'green city' will mainstream environment-friendly power through solar rooftop systems on all its houses, solar parks on the city's outskirts, waste to energy plants and electric mobility-enabled public transport systems.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.
